Best Chauffeured Worldwide client:

Re: Best Chauffeured Worldwide implements Environmental Sustainability Program

It is my pleasure to inform you that Best Chauffeured Worldwide has embarked on a comprehensive company-wide environmental sustainability program. Through Green Ride Global, our independent third-party verifier which will oversee and support our ongoing implementation of environmental sustainability initiatives for our organization, we are transforming all areas of operation to reduce our environmental footprint. The program is ISO 14001 compliant, which means you have the assurance of international best practices in the reduction of the environment impact of each of your trips with us.

The first phase of our program includes measuring our baseline greenhouse gas (GHG) emissions and establishing significant annual emissions reduction targets. Our sustainability plan includes long-term strategies to minimize the carbon footprint of our company through reductions in fuel consumption, energy use, and waste. We are committed to reducing the GHG emissions associated with our fleet and facilities by 20% to 30% over the next 5 to 10 years.

As a value-added service to our clients, we have the capability to provide annual reports showing your company's Scope 3 GHG emissions related to your ground transportation usage. In turn, your organization's environmental footprint will be reduced as you continue to use Best Chauffeured Worldwide for your ground transportation needs.

If you have any questions regarding our environmental sustainability initiative, or would like to speak with a representative from Green Ride Global, please feel free to contact me. www.greenrideglobal.com

Best regards,
